

COMPETENCIES AND OUTCOMES ALIGNMENT TO TWENTYEIGHTY STRATEGY EXECUTION TRAINING

| Competencies Required | Our Courses | Duration | Expected Performance Outcome |
|--|--|--|--|
| 1. Information Management | IT PM: Management and Resources (FPM 401) | 3 days (2-day and 4-day agendas are available) | Identify the need for and know where or how to gather information; organizes and maintains information residing on information management systems. |
| 2. Data Management | | | Operationalize the principles, procedures, and tools of data management, such as modeling techniques, data backup, data recovery, data dictionaries, data warehousing, data mining, data disposal, and data standardization processes. |
| 3. Accessibility | | | Select tools, equipment, and technologies used to assist individuals with disabilities to use computer equipment and software. |
| 4. Technology Awareness | | | Discover and implement new developments and applications of information technology (hardware, software, and telecommunications), emerging technologies and their applications to business processes, and applications and implementation of information systems to meet organizational requirements. |
| 5. IT Performance Assessment | | | Select the principles, methods, and tools (for example, surveys, system performance measures) to assess the effectiveness and practicality of information technology systems. |
| 6. IT Program Management | | | Implement the principles, methods, and tools for the coordinated management of an IT program to include providing oversight of multiple IT projects, integrating dependent schedules and deliverables, and related activities (for example, benefits management, life cycle management, program governance). |
| 7. Information Resources Strategy and Planning | | | Administer the principles, methods, and techniques of information technology (IT) assessment, planning, management, monitoring, and evaluation, such as IT baseline assessment, interagency functional analysis, contingency planning, and disaster recovery. |

TwentyEighty Strategy Execution’s fully revised FAI-verified FAC-P/PM certification training curriculum is available through the GSA Schedule. The GSA contract number is GS-02F-0058P.

Federal Acquisition Institute (FAI) verified certification courses have been reviewed by FAI and they have verified the courses properly align to the applicable Office of Federal Procurement Policy (OFPP) competency model and federal certification policy.

| Competencies Required | Our Courses | Duration | Expected Performance Outcome |
|--|---|--|--|
| 8. Information Assurance | IT PM: Operations and Security (FPM 402) | 3 days (2-day and 4-day agendas are available) | Apply methods and procedures to protect information systems and data by ensuring their availability, authentication, confidentiality, and integrity. |
| 9. Information Systems/ Network Security | | | Demonstrate methods; select tools and procedures, including development of information security plans, to prevent information systems vulnerabilities and provide or restore security of information systems and network services. |
| 10. Information Systems Security Certification | | | Implement principles, methods, and tools for evaluating information systems security features against a set of specified security requirements. Includes developing certification and accreditation plans and procedures, documenting deficiencies, reporting corrective actions, and recommending changes to improve the security of information systems. |
| 11. Enterprise Architecture | | | Comprehend the principles, concepts, and methods of enterprise architecture to align information technology (IT) strategy, plans, and systems with the mission, goals, structure, and processes of the organization. |
| 12. IT Architecture | | | Employ architectural methodologies in the design and development of information systems, including the physical structure of a system's internal operations and interactions with other systems. |
| 13. Infrastructure Design | | | Comprehend the architecture and typology of software, hardware, and networks, including LANS, WANS, and telecommunications systems, their components and associated protocols and standards, and how they operate and integrate with one another and with associated controlling software. |
| 14. Operations Support | | | Establish procedures to ensure production or delivery of products and services, including tools and mechanisms for distributing new or enhanced software. |
| 15. Configuration Management | | | Determine the principles and methods for planning or managing the implementation, update, or integration of information systems components |
| 16. IT-Specific Core | | | IT PM: Core Principles and Processes |
