NEW!

FEDERAL IT PROJECT MANAGEMENT ASSOCIATE'S AND MASTER'S CERTIFICATES

In partnership with The George Washington University (GW), Strategy Execution offers two federal IT project management certificate paths. The first allows you to obtain an Associate's Certificate in Federal IT Project Management. This certificate exhibits your knowledge and skills within the federal IT project management discipline. The second is a Master's Certificate in Federal IT Project Management from Strategy Execution and GW.

Obtaining the master's certificate allows you to add GWCFIP credentials after your name, and highlights your expertise in the field of federal IT project management. The GWCFIP (The George Washington University Certified Federal IT Project Manager) certification, established by Strategy Execution in association with the GW School of Business, is a recognized credential in federal IT project management. A GWCFIP practitioner has acquired core federal IT project management knowledge through the successful completion of at least seven Strategy Execution courses that lead to a Master's Certificate in Federal IT Project Management.

Certificates from Strategy Execution and GW acknowledge and reward individual achievement while adding authority to your organization's strategic learning initiatives. We believe the right learning and development initiative that centers on the measurement of mission outcomes, can help you do both, and get the certification you need in the process.

Completing all 3 core courses required for the Associate's Certificate in Federal IT Project Management will also satisfy the training requirements for the FAC-P/PM IT-Core Plus certification, in addition to required Level 2 or Level 3 certifications. For more details on FAC-P/PM training please go to www.strategyex.com/facppm.
