

## Project Management

TwentyEighty Strategy Execution offers project management training courses that cater to the educational needs of project professionals of all levels. Our courses are aligned to industry-recognized standards and are offered in a variety of modalities including on-site instructor-led courses, public instructor-led courses, virtual instructor-led courses, and eTraining. Select courses are available through our GSA Federal Supply Schedule GS-02F-0058P contract.

### Available Courses:

#### Business Process Analysis Innovation and Design

Learn practical techniques for designing critical processes in corporations, government agencies and nonprofit organizations through this valuable course. Get answers to fundamental questions about process innovation: what it is, what benefits it affords, and why it necessitates rethinking an organization's use of information technology and management control mechanisms.

#### Contract Management Principles and Practices

Get an overview of all phases of contracting, from requirements development to closeout. This course explores these vital issues from the manager's perspective, highlighting key roles and responsibilities to give you greater influence over how work is performed.

#### Introduction to Project Management

*Introduction to Project Management* will help you to describe the roles and responsibilities of project team members across the project life cycle. In this class you will learn to define and develop the foundations of a project management plan, including the project requirements document, work breakdown structure, schedule, and other resources.

### IT Risk Management

In *IT Risk Management*, you'll learn to look at risk management as a way to seize opportunities, minimize threats and achieve optimum results. You'll work through a proactive approach to threat and opportunity, based on a clear understanding of the powerful nature of qualitative and quantitative approaches to risk management.

### Managing IT Projects

In this comprehensive introductory course, you'll discover critical success factors and hidden risks inherent in IT projects and leave with an understanding of strategies and techniques developed in the field by experienced IT project managers that lead to successfully managed IT projects.

### Managing Projects

*Managing Projects* gives you the foundation, techniques and tools to manage each stage of the project life cycle, work within organizational and cost constraints, set goals tied directly to stakeholder needs, get the most from your project management team, and utilize state-of-the-art project management tools to get the work done on time and within budget.

## Available Courses (cont'd):

### Negotiation Skills for Project Managers

This three day, highly interactive experience covers the dynamics, processes and techniques of internal and external negotiation situations. By the end of the course, you will have explored the dynamics of both the competitive and collaborative models of negotiation as well as some of the implications of team negotiations.

### PMP® Exam Power Prep

This well-proven and successful course will improve participants' chances of passing the grueling PMP® certification exam. Participants will find out exactly what they need to know and how to prepare themselves to successfully tackle any question on the exam.

### Project Leadership, Management and Communications

*Project Leadership, Management and Communications* is an interactive course designed to provide a solid foundation in key leadership competencies and to afford you the opportunity for a truly transformational leadership experience.

### Project Management Applications

You'll propose, plan and execute a full-scale project under typical organizational constraints. Follow your project through the life cycle, resolving issues of performance, scheduling and control as you address questions of leadership and management.

### Project Planning, Analysis and Control (PPAC)

*Project Planning, Analysis and Control* gives intensive instruction in project management fundamentals across the entire project life cycle. It provides proven strategies and practical tools for planning, executing, and controlling a variety of projects. It also offers detailed and sophisticated instruction in the critical areas of scheduling key events, controlling costs, and managing risks.

### Quality for Project Managers

You'll learn about the philosophy and principles of quality management and learn how to translate these concepts into specific actions that are key to successful project quality efforts. The course presents a five-step model for successfully planning project quality, a five-step model for effectively assuring project quality and a quality-control toolkit, all of which you can immediately apply to your work environment.

### Requirements Management: A Key to Project Success

*Requirements Management* takes the project manager beyond the basics of all aspects of the requirements management process, from concept through closeout. Participants will learn up-to-date practices for requirements management and a recommended requirements management process, including proper selection of tools and techniques for specific types of projects.

### Risk Management

In this *Risk Management* course, you'll work through a proactive approach to threat and opportunity—based on a clear understanding of the powerful nature of both qualitative and quantitative approaches to risk management.

### Scheduling and Cost Control

Develop effective measures for scheduling and controlling projects as you put the tools of project management to work. In this course you'll focus on managing the constraints you face in any project: limits on time, human resources, materials, budget and specifications.

### Unlocking the Power of Earned Value Management

You'll review key project documents to gain an understanding of their relationship to effective project evaluation and control using EVM. You'll explore the challenges and approaches involved in establishing a baseline and obtaining accurate, timely and useful information to measure project performance with EVM.

### Writing Statements of Work: The Heart of any Contract

This course employs challenging team exercises and case studies that will take you through the process of building a solid statement of work. The skills learned in this practical course can be immediately applied by anyone involved in writing, negotiating, awarding or administering SOWs.

PMP is a registered mark of the Project Management Institute.
